### PROGRAMMING LANGUAGES

Python | React | CSS | Html | C++ | C | Java | Git | JavaScript | TypeScript | MySQL | SQL | SQLite | PostgreSQL | Spring Boot Test

## ADDITIONAL INFORMATION

### Hobbies and interests

**Hobbies and interests** Beyond academics, I maintain a rigorous training regime in kickboxing, where I've competed in amateur matches and achieved a winning record. This experience has significantly increased my work ethic, discipline, and ability to perform under pressure.

Coding and problem-solving are of great interest to me, which I do daily. I'm self-taught in web development and am always looking to improve my expertise through online research. In the past year, I've developed a passion for web security and I'm proactively expanding my knowledge through research.

I'm currently part of a team building a web app for my university. This app, currently in development, will allow students to manage and organize their day-to-day lives and make it easier for them to get better grades consequently.

**What I imagine for the future** My life code is to be better tomorrow than I am today and always learn and adapt to the new technologies that arise.

I stand for continuous development throughout life, but I always seek a balance between the professional and the private side, staying close to my family and doing other activities.
